

The Scandinavian Hydrogen Highway Partnership
announces

THE 7TH NORDIC HYDROGEN AND FUEL CELL CONFERENCE

Welcome to HFC Nordic 2018!

Iceland is now taking a leap into the future of hydrogen. 15 years ago Iceland built the first commercial hydrogen station (and hosted the first HFC Nordic). In 2018, as part of the H2ME-2 project three hydrogen refueling stations will be built and a fleet of vehicles will be deployed.

This year, Reykjavík welcomes you once again. The conference will be held at the **Grand Hotel Reykjavík** **October 9-10**.

Seize this opportunity to network with Nordic hydrogen and fuel cell experts, decision makers and key industry stakeholders. The future starts now!

Agenda and details are available at the conference website
<https://www.altenergy.info/#welcome-hfcnordic>

Key presenters include:

Element Energy, H2 Energy, Hydrogen Denmark, Hydrogen Mobility Europe, Hyop, Hyundai, Jive, Nel, Scania, Toyota, Vattenfall, Wrightbus and opening remarks by the Icelandic Minister for Industry, Energy and Tourism.

For further information, contact Anna Margrét Kornéliusdóttir via email at amk@newenergy.is or telephone +354 863 6506.
